

Home Fire Escape Planning

02

Plan your way out before a fire happens.

FIRE SAFETY TIPS

- 1 Draw a simple floor plan and identify two ways out of every room whenever possible.
- 2 Choose one outside meeting place a safe distance from the home where everyone will gather.
- 3 Practice the escape plan with everyone in the household at least twice each year.
- 4 Keep exits, hallways, stairs, doors, and windows clear so they can be used quickly.
- 5 If there is smoke, stay low while moving to an exit. Once outside, stay outside and call 911.

REMEMBER

Do not go back inside a burning home for people, pets, or belongings. Tell firefighters what is missing.
